Mexico WindPower 2020

Mexico's most important Congress and Exhibition for the Wind Power Sector

Düsseldorf (November 18, 2019) Mexico WindPower will present its 9th edition from March 4-5, 2020 in the Centro Citibanamex, Mexico City. The event is organized by the Global Wind Energy Council (GWEC) and the Mexican Wind Energy Association (AMDEE), together with Tarsus México.

Over 3.700 professionals from 23 countries attended WindPower in 2019. Exhibitors such as Isepa, Senvion and BASF, among others, presented their solutions. Nordex, Siemens Gamesa, Enercon GmbH or Vestas supported the event as Megawatt Sponsors.

The congress was the first opportunity of the year to bring together the main participants in this field, including developers of strategies, government leaders, executives from project developers, manufacturers of equipment and components, suppliers of financial and technical services, researchers and developers. Mexico WindPower 2019 presented a top level congress program focusing on the development of Mexico's wind potential and the reforms and technologies.

Mexico has a wind power potential of over **50,000 MW** and only around **17,000 MW** would need to be used to meet the target of generating **35%** of electrical energy from clean technologies by **2024**. The installed capacity is estimated to generate **5,891 MW** this year and it will reach a capacity of **12,986 MW**, over **7,005 MW** more, between **2020** and **2022**.

As the new Mexican government began their mandate, new regulations and reforms continue to be implemented in the energy sector. The energy supply system in Mexico is in a big change. In parallel to the roll-out of renewable energies the demand for power efficiency technologies is constantly growing. This offers interesting opportunities for European companies to tap into this market.

Energy Mexico is organized by Tarsus and represented in Europe by their partner E.J. Krause & Associates. For additional information and options to participate, please contact the EJK office in Germany or visit the official website.
